Projects

JobIfy (MERN Stack) | *React.js, MongoDB, Node.js, Express.js, Redux, Tailwind, Shadcn*

Feb 2025

- Developed a comprehensive Job Application App using the MERN stack (MongoDB, Express.js, React, Node.js). The platform streamlined the job application process with real-time job listings, job applying, applicant tracking, and dynamic profile management.
- **Implemented RESTful APIs** for seamless data flow between frontend and backend.
- **Utilized MongoDB Atlas** for scalable and efficient database management.
- Focused on **UI/UX design** to enhance user experience.
- This project demonstrated **full-stack development expertise** and optimized the job search experience for users.

GharLelo (MERN Stack) | *React.js, Tailwind, MongoDB, Express.js, Firebase, Render* | [Live Site](#)

Dec 2024

- Developed a comprehensive MERN stack web application, "Gharlelo", aimed at revolutionizing the real estate market by providing a seamless platform for property listings and transactions, using **MongoDB** for efficient data storage and **React.js** to build the front end of the project.
- Integrated **Contact System** for user connection with the seller and **Firebase** for user authentication, enhancing system security and boosting user trust.
- Designed a responsive, mobile-first UI using **Tailwind CSS** and deployed on **Render**. Optimized performance, reducing downtime and scaled the system to efficiently handle over concurrent users.
